- 

## Projects

### Websites- Book Store/ Blog :

The website designed for student study materials and video accessibility was created using HTML, CSS, and JavaScript. On the other hand, the blog website was developed utilizing EJS, enabling the creation of dynamic web pages.

### Weather App using API:

This is a weather application developed using Flutter that employs API to obtain weather data of various locations.

### Detection of falsified selfish nodes and route optimization :

Our final year project involves utilizing the Chimp Optimization Algorithm. This algorithm facilitates the identification of falsified nodes and optimizes the WSN routes.
